

DEATHMANCER

Solo Mode

A scenario-controlled solo variant for Deathmancer. These rules complement the core rulebook and should be used only when playing solo.

16. SOLO MODE: THE FALLEN SCENARIOS

Solo Mode follows the normal Deathmancer rules except where stated in this section. You play your own deck normally, with a shuffled deck, random hand draw and the usual decisions around scoring, recruiting, summoning and killing.

The enemy is a scenario-controlled Commander. It does not draw cards, hold a hand or use Purgatory. Its actions and card-effect choices follow the rules below. Each enemy Commander has six solo scenarios. Roll one D6 during setup to determine which scenario you face.

Solo Setup

- Choose your Commander and deck as normal, then choose the enemy Commander you will face.
- Roll 1D6 and use the matching enemy scenario.
- Set aside the 3 enemy Heroes and 3 enemy Summons listed for that scenario. These are the enemy's available cards. Apply any special scenario setup.
- Begin in Regular Mode. Once completed, use Hard Mode for a greater challenge. The player's starting score is shown below.

Player Commander	Regular Mode	Hard Mode
Archimedes	20	12
Balthazar	13	8
Chronos	18	10
The Gatekeeper	9	6

- The enemy begins on its printed starting SOL unless the scenario states otherwise: Chronos starts on 10; The Gatekeeper starts on 6.
- The player has Round 1 Initiative unless the scenario states otherwise; determine it normally from Round 2.
- The normal win condition applies: first to 100 Score wins. If neither side reaches 100 by the end of Round 6, highest Score wins, unless a Dead Chronos triggers The Seventh Hour and extends play to Round 7.

Enemy Card Abilities

These rules apply to **all four enemy Commanders and all scenarios**. Enemy units use their current card text, subject to the enemy's handless rules and the scenario's instructions.

- **Passives:** apply whenever their conditions are met. Timed Passive effects resolve at the timing printed on the card, including specified start-of-round and end-of-round effects.
- **On Recruit:** resolve immediately after the Hero enters the Living Realm by recruitment, or through an effect that expressly permits normal On Recruit effects. Pay all required costs before resolving the effect.
- **On Summon:** resolve when the Summon actually enters play, including a free Grave Surge summon. A card reserved for later arrival is not in play and does not trigger until it enters.
- **Activated Abilities:** use only when a scenario prescribes them, or when the enemy Commander cannot legally ATK or score. A scripted Ability replaces the enemy's Undead attack; it is not an additional action.

17. SOLO MODE: ENEMY TURN LOGIC

The enemy uses the same Living Realm, Dead Realm, Score, multiplier and damage rules as the normal 2+ player game. The difference is that its choices are prescribed.

Realm Action Order

Normally, resolve the **Living Action first, then the Undead Action**. **The Gatekeeper is the exception: when he is in the Dead Realm, resolve his Undead Action first, then his Living Action**. For a scenario-controlled Gatekeeper, resolve his compulsory Realm switch before either action, then use the order for his resulting Realm. See Section 20.

Enemy Living Action

- If the enemy has Living units, they post score. Only the scenario Commander may score in both realms in the same round. The human player may score once per round, in either realm.
- If the enemy has no Living units, the player chooses one available, affordable enemy Hero from the scenario pool and recruits it to the enemy Living Realm.
- The enemy must pay the recruited Hero's normal cost. If it cannot afford an available Hero, the action is lost.

Enemy Undead Action

- If the enemy Commander is Undead, it must use Commander Override to score.
- If the enemy Commander is not Undead, all enemy Undead attack, unless a scenario prescribes an Ability instead.
- Enemy Undead prioritise the player's weakest eligible Living unit or units, measured by remaining SOL. Apply targeting restrictions first. If eligible targets are tied, the player chooses.

Grave Surge

From Round 3 onwards, roll terrain at the start of each round as normal. In Solo Mode, odd terrain rolls also trigger Grave Surge for the enemy.

Terrain Roll	Grave Surge Result
1	Summon the scenario's highest-threat available Summon (★★★).
3	Summon the scenario's middle-threat available Summon (★★).
5	Summon the scenario's lowest-threat available Summon (★).

The stars beside a scenario Summon rank its relative threat **within that encounter**. They are not its printed MULT. Use the fixed Roll 1, Roll 3 and Roll 5 entries in the scenario table, even when the card with the higher printed multiplier is in a lower slot.

A Grave Surge summon costs no Score and does not use an action. If the indicated slot is unavailable, use the nearest legal, unused slot. If two slots are equally close, use the stronger slot. If no scenario Summons remain available, no Summon enters play unless the scenario twist says otherwise.

Scenario Pool Availability

Each scenario provides one copy of each listed Hero and Summon. Once a card is recruited, summoned, reserved for a delayed arrival or placed on the board during setup, its scenario-pool slot is used. Leaving play does not make that slot unused again. A card may still be returned by a legal card effect.

The Doom Toll

When a Doom Toll condition is triggered, add 1 Fallen token to the enemy's Undead Realm. Fallen tokens use their normal rules and stats.

Doom Toll Condition	Effect
The enemy Commander contributes positive posted score while Living.	Enemy gains 1 Fallen.
The enemy kills one of your Living units.	Enemy gains 1 Fallen.
The enemy reaches or exceeds 50 Score for the first time.	Enemy gains 1 Fallen.
The enemy reaches or exceeds 75 Score for the first time.	Enemy gains 1 Fallen.

Each score threshold can trigger only once per game. **A Living Commander with 0 scoring POW does not generate the scoring Doom Toll**, even if other Living units score or the Undead multiplier is large.

Grave Harvest

When you kill an enemy Living unit in Solo Mode, add 1 Fallen token to your Dead Realm also. This is Grave Harvest. The player does not gain Fallen tokens for reaching score thresholds.

Purgatory Rift

Purgatory cannot be played normally in Solo Mode. When you draw Purgatory, reveal it and discard it immediately. You may then choose one Summon card from your hand and place it directly into your Undead Realm. This summon costs no Score and does not use an action. If you are unable to do so, the effect is lost.

Cards Returned to Play

Permanent increases to maximum POW and SOL remain with a card when it is discarded and later returned. Returning a card to play does not remove those increases. When playing Chronos, returning Purgatory to hand can trigger another Purgatory Rift.

18. SOLO MODE: BALTHAZAR SCENARIOS

When Balthazar is the enemy Commander, roll 1D6 and use the matching scenario below. The shared card-effect rules apply throughout.

D6	Scenario	Scenario Twist
1	The Choir of Ashes	Ashen Vanguard: the enemy starts with +10 Score.
2	The Saints of Ruin	Ruinous Sermon: enemy Living posted score gains +1 POW before applying the multiplier.
3	The Black Benediction	Black Blessing: the first threshold Doom Toll adds 2 Fallen instead of 1.
4	The Blighted Host	Blighted Ground: an exhausted Grave Surge pool gives the enemy 1 Fallen instead.
5	The Ascendant Grave	Ascendant Grave: Undead Balthazar's Commander Override gains +5 Score after MULT.
6	The Final Hymn	Final Hymn: from Round 5, all enemy posted score gains +5 POW before MULT.

1. The Choir of Ashes

Plain, brutal pressure. A straightforward scenario built around high-stat Living units.

Scenario Twist: Ashen Vanguard: the enemy starts with +10 Score.

Available Heroes	Grave Surge Summons
Baal, The Profane; Avalon, The Ruinbringer; Vissago, The Veiled	Roll 1: Sloth, Tyrant of Despair (★★★) Roll 3: Grief, Anguished Lover (★★) Roll 5: Woe Is Me, Pitiful Spectre (★)

2. The Saints of Ruin

Corrupted saints and heavy Living pressure.

Scenario Twist: Ruinous Sermon: when enemy Living units post score, add +1 POW to the total before applying the multiplier.

Available Heroes	Grave Surge Summons
Azael, The Despotic; Malachar, The Tyrant; Leviathan, The Unending	Roll 1: Corruption, The Proposition (★★★) Roll 3: Wrath, Grievous Impaler (★★) Roll 5: Leecher, Soul Stealer (★)

3. The Black Benediction

A ritual scenario where score milestones accelerate the enemy army.

Scenario Twist: Black Blessing: the first Doom Toll gained from a score threshold adds 2 Fallen instead of 1.

Available Heroes	Grave Surge Summons
Daemon, The Desecrated; Belial, The Unbound; Azael, The Despotic	Roll 1: Abyss, Herald of Dark (★★★) Roll 3: Agony, Pits of Anguish (★★) Roll 5: Leecher, Soul Stealer (★)

4. The Blighted Host

A wider Undead pressure scenario, built to punish repeated bad terrain rolls.

Scenario Twist: Blighted Ground: if Grave Surge cannot summon because no scenario Undead remain, the enemy gains 1 Fallen instead.

Available Heroes	Grave Surge Summons
Hunger, The Devourer; Bane, The Night King; Daemon, The Desecrated	Roll 1: Sloth, Tyrant of Despair (★★★) Roll 3: Agony, Pits of Anguish (★★) Roll 5: Grief, Anguished Lover (★)

5. The Ascendant Grave

The scenario where killing Balthazar is most dangerous.

Scenario Twist: Ascendant Grave: if Balthazar is Undead, his Commander Override gains +5 Score in total, after applying MULT.

Available Heroes	Grave Surge Summons
Baal, The Profane; Belial, The Unbound; Bane, The Night King	Roll 1: Abyss, Herald of Dark (★★★) Roll 3: Corruption, The Proposition (★★) Roll 5: Wrath, Grievous Impaler (★)

6. The Final Hymn

A late-game pressure scenario that pushes the race to 100. Its Living units bring problematic Passives and recruitment effects.

Scenario Twist: Final Hymn: from Round 5 onwards, enemy posted score gains +5 POW before applying the multiplier. This applies to all enemy scoring actions, including Commander Override.

Available Heroes	Grave Surge Summons
Daemon, The Desecrated; Hunger, The Devourer; Leviathan, The Unending	Roll 1: Abyss, Herald of Dark (★★★) Roll 3: Sloth, Tyrant of Despair (★★) Roll 5: Grief, Anguished Lover (★)

Card Text Reminders

Corruption: opponents may recruit or summon for 2 less cost, giving his controller +4 Score. Avalon: whenever an opponent gains Score from a card effect, his controller gains the same amount. Agony: its no-healing effect applies to all players next turn.

19. SOLO MODE: ARCHIMEDES SCENARIOS

When Archimedes is the enemy Commander, roll 1D6 and use the matching scenario below. The shared card-effect rules apply throughout.

D6	Scenario	Scenario Twist
1	The Silent Saints	Silent Order: the scenario uses strong, straightforward Heroes.
2	The Shielded Host	Shielded Host: the first enemy Living unit killed each round survives on 1 SOL instead.
3	The Gilded Tribunal	Judgement: your highest-POW Living unit has -1 POW each round, until that round ends.
4	The Martyr's Procession	Martyrdom: whenever you gain Grave Harvest, the enemy gains 1 Fallen too.
5	The Soul Sap	Soul Drain: each of your Living Heroes loses 1 SOL at the start of each enemy Living Action.
6	The Last Virtue	Last Virtue: while Archimedes is Living, enemy Living units take 1 less damage.

1. The Silent Saints

A clean, high-stat encounter.

Scenario Twist: Silent Order: this scenario uses strong but simple Heroes only. Resolve their Passives and entry effects normally.

Available Heroes	Grave Surge Summons
Saraphim, The Guard; Malaka, The Lightbearer; Eve, Hardened Maiden	Roll 1: Sanctifier, Purifying Wraith (★★★) Roll 3: Arbiter, Spirit Judge (★★) Roll 5: Echo, Spirit of Realms (★)

2. The Shielded Host

Protection, healing and forcing the player to overcommit damage.

Scenario Twist: Shielded Host: the first enemy Living unit that would be killed each round survives on 1 SOL instead.

Available Heroes	Grave Surge Summons
Mercy, The Last Hand; Dawn, Merciful Light; Bastion, Pious Monk	Roll 1: Banisher, Righteous Adjudicator (★★★) Roll 3: Purity, Cleansing Grace (★★) Roll 5: Grave, Warden of Lost Souls (★)

3. The Gilded Tribunal

Control and disruption, reducing the player's best scoring line.

Scenario Twist: Judgement: at the start of each round, your highest-POW Living unit has -1 POW until the end of the round.

Available Heroes	Grave Surge Summons
Warden, Faithful Protector; Archer, Radiant Arrow; Lumina, Speedy Scout	Roll 1: Sanctifier, Consecrating Wraith (★★★) Roll 3: Arbiter, Spirit Judge (★★) Roll 5: Purity, Graceful Revenant (★)

4. The Martyr's Procession

A scenario where killing enemy Living units still feeds the enemy engine.

Scenario Twist: Martyrdom: whenever you gain Grave Harvest, the enemy also gains the Doom Toll (+1 Fallen token).

Available Heroes	Grave Surge Summons
Mercy, The Last Hand; Bastion, Pious Monk; Scribe, Record Keeper	Roll 1: Choir, Voices Unite (★★★) Roll 3: Veil, Enigmatic Shade (★★) Roll 5: Purity, Graceful Revenant (★)

5. The Soul Sap

Attrition pressure that weakens the player's Living Realm over time.

Scenario Twist: Soul Drain: at the start of each enemy Living Action, each of your Living Heroes loses 1 SOL.

Available Heroes	Grave Surge Summons
Warden, Faithful Protector; Dawn, Merciful Light; Lumina, Speedy Scout	Roll 1: Veil, Bound Shade (★★★) Roll 3: Arbiter, Spirit Judge (★★) Roll 5: Grave, Warden of Lost Souls (★)

6. The Last Virtue

The most resilient Archimedes scenario, encouraging the player to decide whether to kill the Commander early.

Scenario Twist: Last Virtue: while Archimedes is Living, reduce all damage dealt to enemy Living units by 1.

Available Heroes	Grave Surge Summons
Saraphim, The Guard; Malaka, The Lightbearer; Bastion, Pious Monk	Roll 1: Banisher, Righteous Shade (★★★) Roll 3: Veil, Enigmatic Shade (★★) Roll 5: Purity, Graceful Revenant (★)

Card Text Reminders

Archimedes: his Undead scoring bonus is a flat +2 Score. **Saraphim:** Guardian prevents opposing actions and effects from selecting other friendly Living units, including the Commander, while Saraphim is a legal target. Global, non-targeted effects are unaffected.

Choir: its +0.1 scaling counts the Undead controlled by the player with the most Undead, which may be its own controller. It does not total the Undead controlled by every player.

20. SOLO MODE: THE GATEKEEPER SCENARIOS

Compulsory Crossing and Action Order

The scenario-controlled Gatekeeper **MUST** switch Realms each turn, **IF ABLE**. Resolve this once, before either Realm action. Then determine his action order using the Realm he has entered.

The Gatekeeper's Realm	First Action	Second Action
Living Realm	Living Action	Undead Action
Dead Realm	Undead Action	Living Action

If The Gatekeeper is in the Dead Realm, his Undead Action takes place FIRST. Do not resolve a Living Action before it, and do not grant another Realm switch between actions. A player-controlled Gatekeeper also uses this Dead-first order, but is not forced to make the scenario enemy's compulsory switch.

Damage persists across Realms. When The Gatekeeper reaches 0 SOL, he remains in the Dead Realm permanently and can no longer switch. His turns then always resolve Undead first, Living second. Death is not Passage: it grants no Passage count or associated POW/MULT increase. Sebastien's separate +2 Score still triggers when death causes a Realm switch.

Each qualifying Passage increases both his Living POW and Dead POW by +1 and his multiplier by +0.1.

Card Effects and Scenario Choices

Zagreus: sacrifice 1 friendly Fallen before returning a Living Hero from your own discard to the Living Realm. Normal On Recruit effects apply, with any further costs paid separately. For an enemy return-to-play effect with no target priority, choose the highest permanent POW, then highest maximum SOL; the player resolves remaining ties.

When The Gatekeeper is the enemy Commander, roll 1D6 and use the matching scenario below. The listed Heroes are ordered by expected threat, not recruitment priority.

D6	Scenario	Scenario Twist
1	The Price of Another Dawn	Passage Paid: a wounded Gatekeeper returning Living exiles 1 Fallen to heal 2.
2	The River Without Names	The Forgotten Name: Lethe binds the player's strongest eligible Living scorer.
3	The Ferryman's Debt	A Soul for the Crossing: Charon spends a Fallen to return a Hero instead of the Undead attack.
4	The Sentence at the End	Sentence Deferred: Andromeda arrives after the round's other end-of-round effects.
5	The Court of Two Kingdoms	The Returning Court: the second and third passages into Dead invite a paid Hero recruitment.
6	The Unending Procession	The Gathering Dead: each compulsory return to Living gives both sides 1 Fallen.

1. The Price of Another Dawn

Every return to the Living must be paid for by someone who will never return.

Scenario Twist: Passage Paid: whenever The Gatekeeper completes his compulsory switch into the Living Realm, if he is wounded and the enemy controls a Fallen, exile 1 enemy Fallen and heal The Gatekeeper by 2, up to his current maximum SOL.

Resolve this after the switch and before the Living Action. It cannot revive a dead Gatekeeper or remove his permanent Dead-Realm lock.

When Hera's On Recruit can be paid for, exile a separate enemy Fallen. Grant +2 permanent maximum SOL and heal 2 to the Living Gatekeeper if he is a legal target; otherwise choose the enemy Living Hero with the highest POW. The maximum-SOL increase applies even if no healing is needed.

Available Heroes	Grave Surge Summons
Trickster, Apprentice of Prometheus; Lord Plutos, Gold Petitioner; Hera, Motherly Love	Roll 1: Cerberus, Three-Headed Hound of The Gates (★★★) Roll 3: The Gates, Threshold Eternal (★★) Roll 5: Charon, Ferryman of the Crossing (★)

2. The River Without Names

The river does not take your life. It takes the purpose for which you lived.

Scenario Twist: The Forgotten Name: if Lethe is in play and has no valid binding, or another eligible Living unit has become a better target, use Lethe's Ability instead of the Undead attack. Target the player's highest-POW eligible Living unit.

Compare targets before applying Lethe's own -2 POW reduction. Do not move an otherwise correct binding merely because that reduction makes another target appear stronger. The player resolves ties.

If the current binding remains the best legal choice, follow normal enemy action logic. The reduction lasts only while Lethe remains in play.

Available Heroes	Grave Surge Summons
Achilles, The Indomitable; Persephone, Queen of Two Kingdoms; Tiny, The Masked Merchant	Roll 1: Lethe, River of Repentance (★★★) Roll 3: The Gates, Threshold Eternal (★★) Roll 5: Odysseus, The Lost (★)

3. The Ferryman's Debt

The ferryman accepts no promise of payment. Another soul must board before the first may leave.

Scenario Twist: A Soul for the Crossing: if Charon is in play, the enemy controls a Fallen, and a Living Hero is available in a discard pile, use Charon's Ability instead of the Undead attack.

Exile the Fallen first. Return a Hero from the enemy's discard before considering the player's discard. In either pile, choose the highest permanent POW, then highest maximum SOL; the player resolves remaining ties. The Hero enters the enemy Living Realm and resolves its On Recruit normally.

A returned Zagreus must sacrifice another enemy Fallen before returning a further Hero from the enemy's discard. A later On Recruit cost cannot be paid using the Fallen already exiled for Charon.

Available Heroes	Grave Surge Summons
Zagreus, Reincarnated; Hera, Motherly Love; Death, The Last Witness	Roll 1: Charon, Ferryman of the Crossing (★★★) Roll 3: Melinoë, Night Abounds (★★) Roll 5: The Gates, Threshold Eternal (★)

4. The Sentence at the End

The Line advances slowly. The verdict does not.

Scenario Twist: Sentence Deferred: when Grave Surge selects Andromeda, reserve her instead of summoning her immediately. After the round's normal end-of-round effects have resolved, including The Line's damage, summon Andromeda and resolve her On Summon effect.

While reserved, Andromeda is not in play and supplies neither attacks nor multiplier. Her pool slot is already used.

Her On Summon destroys all Living with 2 SOL or less remaining, including eligible enemy units and a vulnerable Living Gatekeeper. Do not resolve it as an opponent-only effect. Lethe receives no scripted activation in this scenario.

Available Heroes	Grave Surge Summons
Achilles, The Indomitable; Lord Plutos, Gold Petitioner; Death, The Last Witness	Roll 1: The Line, Awaiting Verdict (★★★) Roll 3: Andromeda, The Quiet End (★★) Roll 5: Lethe, River of Repentance (★)

5. The Court of Two Kingdoms

He does not cross alone. Each return brings another claimant to the throne.

Scenario Twist: The Returning Court: on The Gatekeeper's second and third compulsory passages into the Dead Realm, immediately recruit one unused, affordable Hero from the scenario pool, even if the enemy already controls Living Heroes.

The player chooses the Hero. The enemy pays its normal recruitment cost and resolves On Recruit effects. This recruitment consumes no action and takes place before either Realm action. If no unused Hero is affordable, that invitation is lost.

Count only compulsory switches into the Dead Realm, not death transitions. Starting Living and crossing each turn gives invitations in Rounds 3 and 5. After recruitment, resolve the Undead Action first, then the Living Action. A permanent Dead-Realm lock prevents future invitations.

Available Heroes	Grave Surge Summons
Heracles, Demi-God; Persephone, Queen of Two Kingdoms; The Minotaur, Maze Guardian	Roll 1: Melinoë, Night Abounds (★★★) Roll 3: Cerberus, Three-Headed Hound of The Gates (★★) Roll 5: Charon, Ferryman of the Crossing (★)

6. The Unending Procession

Each time the gates reopen, more souls gather on both sides.

Scenario Twist: The Gathering Dead: whenever The Gatekeeper completes his compulsory switch into the Living Realm, both sides gain 1 Fallen. Resolve this after the switch and before the Living Action.

These tokens are additional to Doom Toll and Grave Harvest. They are not kills or scoring events and do not, by themselves, trigger either system. No tokens are granted when death permanently prevents The Gatekeeper from returning to the Living Realm.

Melinoë counts all Fallen in play, including the player's. Each such crossing therefore adds two Fallen to the population she counts. The Line's normal end-of-round damage and The Gates' protection remain active.

Available Heroes	Grave Surge Summons
Achilles, The Indomitable; Heracles, Demi-God; Persephone, Queen of Two Kingdoms	Roll 1: Melinoë, Night Abounds (★★★) Roll 3: The Line, Awaiting Verdict (★★) Roll 5: The Gates, Threshold Eternal (★)

21. SOLO MODE: CHRONOS SCENARIOS

When Chronos is the enemy Commander, roll 1D6 and use the matching scenario below. Chronos uses the normal Living-then-Undead action order.

The Unspent Hour and The Seventh Hour

The Unspent Hour: once per game, if an opponent's Action would reduce Living Chronos to 0 SOL, cancel that entire Action, not only the damage directed at Chronos. Past's self-inflicted damage does not trigger this protection.

The Seventh Hour: if Chronos is Dead and nobody has reached 100 Score at the end of Round 6, play Round 7 and give Chronos Initiative. This is not an automatic seventh round while he is Living. If neither side reaches 100 in Round 7, highest Score wins.

D6	Scenario	Scenario Twist
1	The Gentle Undoing	The Patient Pendulum: even terrain rolls cost you 2, 4 or 6 Score; odd rolls trigger Grave Surge as normal.
2	The Dream Without Dawn	The Sleeping Champion: Hypnost suppresses a future scorer; Doom is the fallback.
3	The Foretold Hour	The Written Omen: begin with The Foreteller. In Round 2, use its Ability to set the Round 3 terrain die to 1.
4	The Clock That Bleeds	Spend the Remaining Years: begin with Past and use its Ability while Chronos is Living. Once Dead, follow normal enemy turn logic.
5	The Hour That Never Was	The Stolen Beginning: when Nucleus enters play, restart the round with Nucleus in play and Chronos holding Initiative.
6	The Seventh Bell	The Last Age: the enemy Chronos starts the game with Initiative and 20 Score.

1. The Gentle Undoing

Time takes back what you thought you had won.

Scenario Twist: The Patient Pendulum: from Round 3 onwards, an even terrain roll also reduces your Score by the number rolled: 2 = -2 Score, 4 = -4 Score, 6 = -6 Score. Odd rolls trigger Grave Surge as normal.

Available Heroes	Grave Surge Summons
Peace, Endless Light & Dark; Sandman, Keeper of Minds; Ante, Time Traveller	Roll 1: Past, Present and Future (★★★) Roll 3: War, Age of Ruin (★★) Roll 5: Nucleus, Reborn (★)

2. The Dream Without Dawn

The safest place on the battlefield is the place from which nothing can be achieved.

Scenario Twist: The Sleeping Champion: while Chronos is Living and a following round remains possible, prioritise Hypnost's Ability instead of the Undead attack. Target the player's highest-POW eligible Living unit that does not already have the same pending effect.

If Chronos is Living but Hypnost cannot usefully act, use Doom's Ability when it can affect a subsequent player turn. Otherwise follow normal enemy action logic. Do not spend an Ability on a future turn or round that cannot occur.

Hypnost's effect applies next Round: its target cannot be damaged but contributes 0 POW throughout that round. It does not wait for the target's next scoring action. Eons has no separate scripted Undead-Action activation here.

Available Heroes	Grave Surge Summons
Aurora, The Dawn; Sandman, Keeper of Minds; Growth, Abundance	Roll 1: Hypnost, Keeper of Dreams (★★★) Roll 3: Doom, Foretold (★★) Roll 5: Eons, Eternal (★)

3. The Foretold Hour

The omen is not a warning. It is an appointment.

Setup: The Foreteller, Mad Dictator starts in the enemy's Dead Realm.

Scenario Twist: The Written Omen: in Round 2, while Chronos is Living, use The Foreteller's Ability instead of the Undead attack to set the Round 3 terrain die to 1. Otherwise, follow normal enemy turn logic.

Available Heroes	Grave Surge Summons
Clanus, Creature Clock; Rursus, Time Traveller; Cataclysm, Inevitable Ending	Roll 1: The Foreteller, Mad Dictator [starts in play] (★★★) Roll 3: War, Age of Ruin (★★) Roll 5: Nucleus, Reborn (★)

4. The Clock That Bleeds

He is not waiting for death. He is spending the years required to reach it.

Setup: Past, Present and Future starts in the enemy's Dead Realm.

Scenario Twist: Spend the Remaining Years: while Chronos is Living, use Past's Ability for the enemy's Undead Action whenever possible. Once Chronos is Dead, follow normal enemy turn logic.

Available Heroes	Grave Surge Summons
Clanus, Creature Clock; Rursus, Time Traveller; Decay, The End	Roll 1: Past, Present and Future [starts in play] (★★★) Roll 3: Hypnot, Keeper of Dreams (★★) Roll 5: Eons, Eternal (★)

5. The Hour That Never Was

The hour begins anew. This time, Chronos moves first.

Scenario Twist: The Stolen Beginning: when Nucleus enters play, restart the round with Nucleus on the board and Chronos holding Initiative.

Available Heroes	Grave Surge Summons
Clanus, Creature Clock; Growth, Abundance; Loss, Aching Memories	Roll 1: Nucleus, Reborn (★★★) Roll 3: Past, Present and Future (★★) Roll 5: War, Age of Ruin (★)

6. The Seventh Bell

The final hour was never the sixth.

Scenario Twist: The Last Age: the enemy Chronos starts the game with Initiative and 20 Score.

Available Heroes	Grave Surge Summons
Clanus, Creature Clock; Cataclysm, Inevitable Ending; Decay, The End	Roll 1: Plague Times, The Withering (★★★) Roll 3: War, Age of Ruin (★★) Roll 5: Doom, Foretold (★)

22. SOLO MODE: QUICK REFERENCE

Solo Term	Meaning
The Doom Toll	The enemy gains 1 Fallen when a listed pressure condition occurs. A Living Commander contributing 0 scoring POW does not trigger the scoring condition.
Grave Harvest	The player gains 1 Fallen when killing an enemy Living unit.
Grave Surge	Odd terrain results from Round 3 summon from the fixed scenario slots: 1 strongest, 3 middle, 5 weakest. Use the nearest unused legal slot if needed.
Purgatory Rift	When you draw Purgatory, or return it to hand with Chronos, discard it to place one Summon from hand into your Undead Realm for no cost or action.
Enemy Card Effects	Passives apply at their stated timing. On Recruit and On Summon resolve when the unit enters as specified. Activated Abilities require a script or the shared fallback.
The Gatekeeper	The scenario enemy must switch each turn IF ABLE, before either action. In Dead, resolve Undead first, then Living. Death permanently prevents further switching.
The Seventh Hour	A Dead Chronos may extend the game to Round 7 if nobody has reached 100 by the end of Round 6.

Player Starting Scores

Commander	Regular Mode	Hard Mode
Archimedes	20	12
Balthazar	13	8
Chronos	18	10
The Gatekeeper	9	6

Round Reminder

- The player draws and plays normally. Resolve card effects at their printed timing.
- Round 2: Auto-Summons enter play as normal, in addition to the three scenario Summons.
- Round 3 onwards: resolve terrain, then Grave Surge on a result of 1, 3 or 5.
- Before the scenario Gatekeeper's actions, resolve his compulsory Realm switch if able.
- Resolve Living then Undead, except for a Gatekeeper in Dead: resolve Undead then Living.
- Apply the scenario's prescribed Ability priorities and track Doom Toll and Grave Harvest.
- Resolve end-of-round effects. A delayed scenario Summon enters at its stated timing.
- First to 100 wins. Otherwise compare scores after Round 6, or after Round 7 if The Seventh Hour extended play.

The Living score. The Undead scale. The best move each turn is rarely obvious.
